Printer insert installation

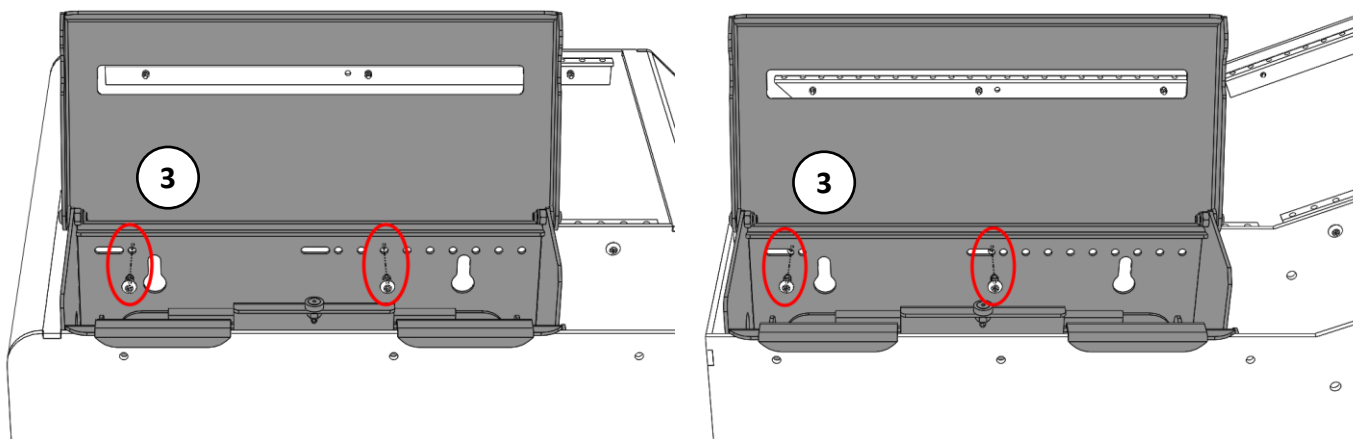

- 1.) Bring the printer insert on the open area of your center console, align the rear outside wall of the insert with the console rear edge, identify the aligning screws holding the rail and remove them using the 1/4 ratchet, 1/4 drive and security T15 bit.

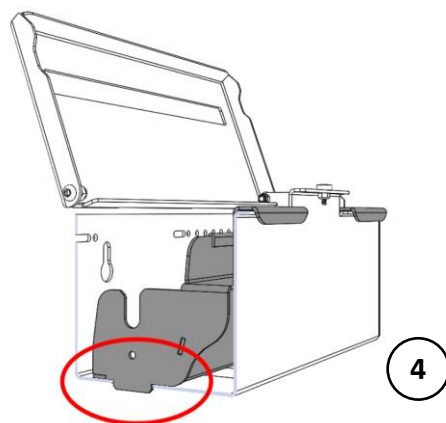

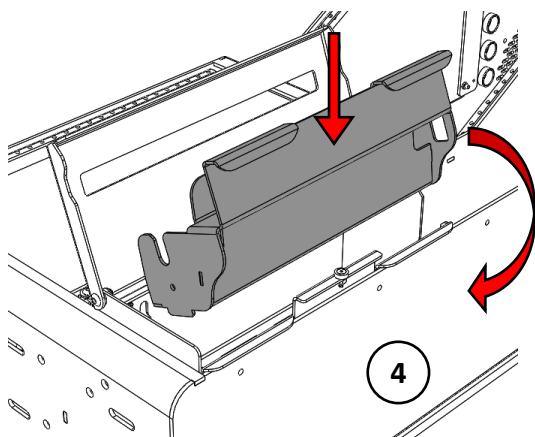

- 2.) If your center console features a flat edge rear wall, bring the printer insert to position and use the obrounds to identify the aligning screws that need to be removed.

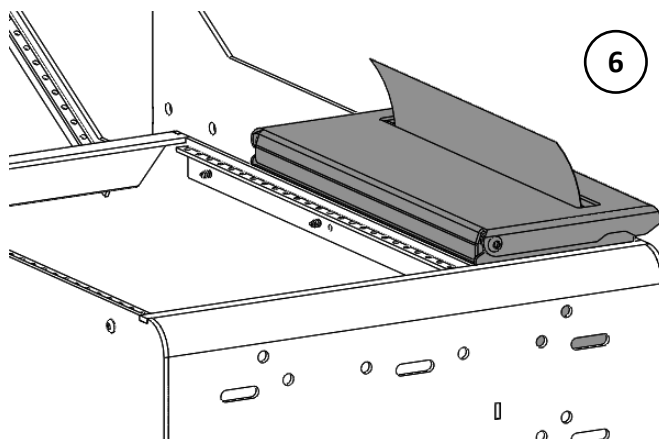

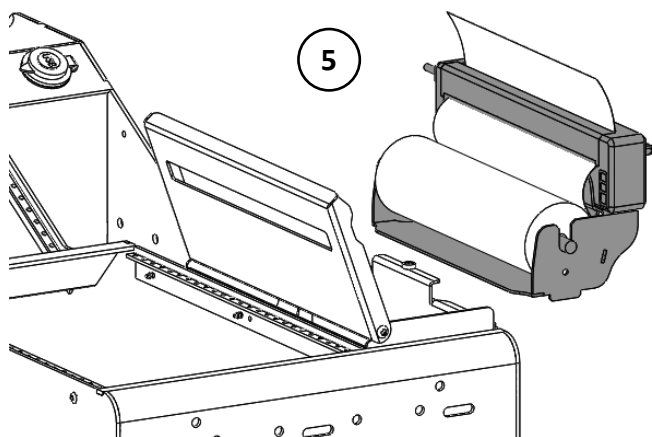

- 3.) Remove the holder bracket from the printer insert, place printer insert in open area of center console and use the previously removed screws to secure the insert in position. Screws are to secure printer insert with center console and installed on rail.

- 4.) Set the holder bracket in printer insert by inserting in the shown manner, holder bracket features bottom locator tabs which lineup with the slots on the printer insert. Connect the power and data cables to the printer (if applicable) and insert it into the holder bracket.

- 5.) Set holder bracket aside with the printer in place and install the paper roll by inserting the provided rod and placing it in the holder bracket as shown.
- 6.) Feed paper into the printer roller, once paper is centered and aligned with the printer cut away any excess paper and set printer back into the insert, close the printer insert lid.

Your installation is now complete. If you have any questions or suggestions for adding additional instructions, please call **Customer Service at (800) 700-8769**.
